第6問題

I agree that Japan should make English an official language because the need to communicate internationally continues to grow more important. English is the most used language in the world and allows many countries and communities to do business. If we want to be competitive internationally and have more options, we should adopt English language in an official capacity. Some companies are already making English their official language because it allows them to grow into an international company. It would also allow foreign people and companies to live and do business within Japan.

I disagree that Japan should make English an official language. We already have English as a subject in our schools and use it when it is needed. If we decide to adopt English as an official language, it would require a massive shift in Japanese society when it comes to legal and civil matters. This would cause a lot of frustration with many Japanese residents and cost the country a huge expense. Japan has a unique identity which is closely tied to its language, so making another language an official language could cause a sense of loss to our history.
