問2	<p>Studying abroad allows students to expose themselves to diverse cultures, languages, and educational systems. In addition, it enhances their global understanding. Studying abroad fosters adaptability, independence, and intercultural competence, which are essential in today's interconnected world. Although it can be challenging, the experience allows students to develop resilience and problem-solving skills, contributing to personal and academic growth. Encouraging more students to study abroad will benefit not only the students but also Japan's cultural and intellectual landscape, as they return with new perspectives. (10点)</p>
